

Geometric morphometrics

Open session

Manuel F. G. Weinkauff

26–27 August 2022

Contents

1	Introduction	1
2	Final survey	1

1 Introduction

We have now covered practical examples of all major things. Nevertheless, there are many more functions that can be used for various other analysis. I encourage you to look at the documentation of all the packages we introduced here, use your own data or any of the example datasets from me or those which are included in the packages.

Try a bit of hands-on work, check things out, and I will be here for any discussions and questions.

2 Final survey

I would be very happy if you could take the time to give me some completely anonymous feedback on how you liked the course, what you liked, what you think needs improvement, and so on. You find the survey [here](#).
